

GA-302-8

CE

Description

The pressure regulator model GA-302-8 was designed to be applied in different applications such as small buildings, residential and industrial areas. It can be used with all non-corrosive gases and equipment for combustion, boilers, industrial stoves, heat exchangers, gas engines, shopping centres etc.

It is extremely easy to install, adjust and inspect. The inspection is done without needing to remove the body valve from the pipe. It is also available with a built-in slam shut valve. The pressure regulator and the slam shut valve are all CE approved.

Technical Specification

Materials:

- Body: Ductile Iron ASTM A536
- Covers: Aluminium
- Internals: Aluminium
- Diaphragm: Buna

Connections:

- 1.1/2" & 2"
- Thread NPT Female / Flange ANSI 150# (only for 2")

Limits of Operation:

- Temperature: -20°C to +60°C
- Regulating: 8 to 455 mbar
- Shut off: 20 to 600 mbar
